Interaction 1

User

Help me with this lab

[Attached files: makefile_tutorial-1.pdf, Lab2-3.pptx, codes-1.zip]

Assistant Summary

Provided C source code files (`isOdd.h`, `isOdd.c`, `main.c`) and a `Makefile` that compiles the files into an executable and includes a `clean` rule. Explained how to compile, run, test, and push the repository to GitHub.

Interaction 2

User

Help me get started. Please include every step.

Assistant Summary

Outlined a step-by-step guide for completing the lab. Provided code for `isOdd.h`, `isOdd.c`, `main.c`, `Makefile`, and a testing shell script (`run_tests.sh`). Detailed commands for compiling, testing locally, initializing a Git repository, and pushing the code to a public GitHub repository.
